

The ASN Operation and Maintenance training service helps customers to **maintain** an efficient level of competence within their O&M staff.

Our goal is to help our customers **fill the gaps** in O&M with training programs.

Refresh training focuses on **updating** (or refreshing) skills for O&M staff, particularly for **key maintenance tasks** that are not performed regularly.

These training sessions are **customized** to meet individual customer needs.

- ✓ Opportunity to learn from **experienced technical support engineers**
- ✓ **Reinforcement** of efficient O&M procedures throughout the life of the network

Training & Refresh Training
