

ASN's Spare Wet Plant Testing Service provides **technical experts** to test and ensure that spare wet plant is in a **good working condition**.

- **Set up the test bench** equipment
- **Run the tests program** on the spare wet plant including repeater, Branching Unit (active or passive) cables, TEQ, SEQ and ROPA equipment
- **Deliver a test report** to the customer maintenance authority

**Wet Plant testing is proposed as a service no CAPEX needed**

ASN Technical Support in Villarceaux, France, provides a direct interface for customers who wish to use the spare Wet Plant Testing Service

## Wet Plant Testing
